Coburn Microfiber Dairy Towels

Benefits to Coburn Microfiber Dairy Towels:

1. Softer than cotton
2. More durable than cotton
 - a. Wash and reuse hundreds of times over
3. More absorbent than cotton
 - a. Absorbs up to 7 times its weight in water
4. Removes bacteria
 - a. On a smooth surface with only tap water it will collect 99% of bacteria
 - b. Does not kill bacteria but collects and contains until washed out
5. Microfibers are 10 times finer than a strand of silk
 - a. This allows the towel to get into cracks and creases of a cows udder than no other textile can
6. Dries faster than cotton
 - a. Less time and energy in the dryer

Care Instructions:

Towels are to be washed with a mild detergent with warm water at less than 160°F, NO FABRIC SOFTENERS OR BLEACH. Wash towels with like items, non-linting and similar in color. Prior to washing, remove all visible organic material from towel as this is where bacteria can survive during the wash. Dry towels in dryer for no more than 30 minutes at 160°F or less.

NOTE: Sawdust bedding may stick to new towels, but this will go away after repeated washings.
